| Description    | <p><b>Avenue Form Curved Plinth Seat Convex + Armrest</b> pairs convex geometry with armrests to offer accessible, supportive seating along active public edges. Mounted on a plinth, it brings clarity and comfort to plazas, walkways, and landscaped settings. Aluminum battens are available in powder-coated, or Alugrain timber-look finishes that reduce reliance on hardwood while retaining natural warmth. Backrests are available in powder-coated finishes.</p> <p>Avenue Form reinterprets traditional public seating through a refined contemporary lens. At its core, Avenue Form gives designers the freedom to shape the landscape, not simply furnish it. Straight, concave, and convex geometries form a flexible framework that defines edges, guides movement, and introduces structure to open ground planes. Modular clarity allows thoughtful configurations that create flow, establish gathering pockets, and transform underutilised areas into intentional destinations.</p> <p>A signature bullnose detail to the two outer battens softens the seating edge, enhancing comfort while reinforcing the collection’s crafted architectural character.</p> <p>Inclusive by design, thoughtful seat heights, supportive backrests, softened edge detailing, and generous proportions enhance everyday comfort, while ADA compliant options ensure access for all.</p> <p>Designed in Australia and manufactured in the USA, Avenue Form is built for the pace, density, and diversity of today’s urban environments. Robust Aluminum construction delivers enduring performance, while a considered palette of finishes allows each installation to respond to its context with cohesion and clarity.</p> |
| Sustainability | <p>We locally source our steel and Aluminum. It means we know it uses recycled content and is 100% recyclable.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

Anchors not included.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Care Instructions   | <div><b>Care + Maintenance</b><br/><b><u>Powder-coat</u></b><br/>Regular cleaning helps protect the long-term appearance of powder-coated finishes. Wash surfaces with warm water and a non-abrasive, pH-neutral detergent, using a soft cloth or brush, then rinse thoroughly. Avoid harsh solvents, abrasive cleaners and high-pressure washing, as these may damage the coating. In coastal, marine or industrial environments, increase cleaning frequency to minimize the build-up of salts and pollutants which can accelerate weathering.<br/><b><u>Alugrain</u></b><br/>Alugrain timber-look finishes require low maintenance and should be cleaned periodically with warm water and a mild, non-abrasive detergent. Use a soft cloth or soft brush and rinse thoroughly to maintain the wood-grain appearance. Avoid abrasive cleaners, solvents or high-pressure washing, as these may damage the decorative coating. In high-exposure environments, increase cleaning frequency to preserve color and surface integrity.</div> |
